

REMARKS

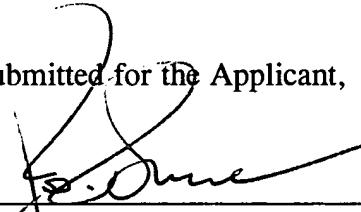

The amendment to the specification is included to introduce a suitable priority claim into the specification at page 1. An abstract of the disclosure is also provided.

The amendment to the claims is submitted to address a discrepancy in the "R" groups as recited in the claims examined at the PCT level. In particular, note that R groups overlap in the PCT claims as originally submitted. That is, each unique position within the claimed compounds does not have a unique "R" designation. Specifically, groups R1 through R6 of formula I do not designate the same positions as R1 through R6 of formula II. This oversight has been addressed in the amended claims by providing each unique position its own numbered "R" substituent.

No new matter has been added to the application by the amendment.

Applicants submit that the application is now ready for examination on the merits. Early notification of such action is earnestly solicited. The Commissioner is authorized to charge any fees or credit any overpayments relating to this application to deposit account number 18-2055.

Submitted for the Applicant,

Joseph T. Leone, Reg. No. 37,170
